

## IMAGE SERVICES

### SLIDE/NEGATIVE/PHOTOGRAPH SCANNING

Take One can scan your slides, negatives and photographic images and convert into current digital formats for saving onto CDs, DVDs, USB sticks and computers. After scanning, your images will be reviewed and processed to adjust colour balance, remove / improve any colour casts from the film, adjust the exposure and contrast and reduce unwanted noise within the image. We can also create professional slide-shows as an alternative way to present your scanned images. Our professional slideshows are an excellent way of presenting your images in a story-telling style and can be set to music of your choice. We will use a creative mix of transitions, effects, collages and animations, to present your images in a slideshow that will evoke all those wonderful memories in a modern creation of pictures and sound. In addition to any scanned images.

Service	Cost	Minimum cost £5.00
Slide and negative scanning	40p each	35mm size slides / negatives
Photograph scanning	35p each	Max size 29.7x21cm
Images supplied on CD	inclusive	Disc supplied in PVC wallet
